

Technology Operations and AI Portfolio Leader

Operator-technologist who turns emerging technology into governed, adopted, measurable work across complex operating environments.

Senior operations and technology leader with direct experience building AI-enabled workflows, operating mechanisms, quality systems, portfolio logic, and cross-functional transformation. Combines strategic framing with hands-on workflow design, human-in-the-loop governance, performance visibility, and execution discipline.

SELECTED LEADERSHIP EXPERIENCE

Vape-Jet - Director of Operations

2025-present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth - Founder / AI and Automation Advisor

2017-present

- Develops AI-readiness and opportunity frameworks spanning value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, automation, robotics, network analysis, and workflow design.

Amazon - Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Served on the Amazon Prime Now launch team with Whole Foods and contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

ROLE-ALIGNED CAPABILITIES

AI portfolio strategy	Responsible AI mechanisms
Digital transformation	Program and stage-gate design
Operating model design	Executive decision support
Value realization	Risk and dependency management
Change and adoption	Cross-functional leadership

OPERATING ADVANTAGE

- Make complex work visible

Translates technical, operational, and governance concerns into decision systems, scorecards, and accountable work.
- Attach AI to outcomes

Connects AI to workflow, human authority, evidence, economics, adoption, and measurable operational behavior.
- Lead from strategy through execution

Works at executive, program, workflow, and operating-mechanism levels rather than stopping at vision.

CREDENTIALS

Google AI Essentials | Food Safety Management Certification | IBM Enterprise Design Thinking Practitioner | Six Sigma Certification | OSHA 10

ADDITIONAL LEADERSHIP EXPERIENCE

Compunetics - Director of Operations and Engineering Management2000-2013

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Cardinal Building Products - Regional Director2021-2023

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data Operations2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Enviro Social Capital - Chairman of the Board2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

IEEE - CMPT and EDS Pittsburgh Chapter Chair2012-2016

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.
- Organized conferences, seminars, business tours, and technical programming.

TECHNOLOGY AND OPERATING TOOLKIT

Agentic AI, LLM workflows, RAG patterns, human-in-the-loop design, Python, SQL, JavaScript, TensorFlow, Tableau, ERP/Odoo workflows, Jira, Confluence, HubSpot, Slack, GIS and mapping workflows.

GOVERNANCE-RELEVANT THROUGH-LINE

High-consequence environments

Advanced electronics, defense-related programs, regulated autonomous operations, food safety, quality systems, and machine-enabled operations.

Decision and control mechanisms

Stage gates, performance measures, root cause, escalation, standard work, human authority, adoption, and learning loops.

Stakeholder translation

Connects executives, operators, engineers, customers, quality, technology, and external partners around concrete decisions and outcomes.

EDUCATION

University of Pittsburgh - Bachelor of Science

Academic grounding includes materials science, physical chemistry, and biology-related studies. Academic work is indexed at Google Scholar.

CANDIDATE THESIS

Govern AI as explicit decision contracts so governance expertise can scale without losing authority, trust, adoption, or measurable value.

DECISION MECHANISMS I BUILD

- Portfolio intake, prioritization, and stage gates
- Named decision rights and escalation paths
- Human-in-the-loop workflow boundaries
- Performance, adoption, and learning scorecards
- Root-cause, exception, and continuous-improvement routines
